

INTERSHIPS

FUJIFILM Diosynth Biotechnologies Denmark

As a CDMO, we develop and manufacture medicines for our customers. We take great pride in knowing, that when our customers achieve breakthroughs in the form of new cures, vaccines, biologics, and other innovations, our work has played a critical role in making it possible. With our world-class manufacturing sites in the US, UK, and Denmark, we are helping our customers improve the lives of people around the world. As we expand our teams, our shared passion - what we call Genki - will always be our driving force.

It's an exciting time to be part of our team in Hillerød. We are expanding into new fields, while growing our existing departments in engineering, process science, quality, and supply chain management. With the addition of 8 x 20,000L bioreactors, our site in Hillerød will become the largest end-to-end CDMO in Europe. We strive to create a workspace that embraces all in the best way possible, and we believe that putting our people first creates a workplace that is not only successful, but also a place where everyone feels valued and fulfilled.

We know that hiring the right people is crucial to delivering the best results for our customers. That's why we hire for values, attitude, ownership, and human skills above all else. While competence and experience are important, we know they can be taught and developed. We believe that every person brings unique talents, strengths, and potential to make a positive impact in our inclusive and diverse culture. We do not treat people like they are all the same. Just be you!

As a member of our team, you can do what you are passionate about and develop both professionally and personally. You will become a part of something bigger than yourself with impact on patients, families, and health systems all around the world.

Do you wish to become part of this dynamic multicultural environment where we deliver results of high quality to our marketed and clinical products, be a part of a fast-growing organisation, data-driven and analytical. You can expect an exciting and challenging time with a high degree of freedom to solve the tasks. Possibility to develop your Engineering skills and use your theoretical knowledge in practise. You will be working with process optimisation, analysis, visual work instructions and procedures as well as being a key member on different projects

You are curious of nature, detail oriented, and keen on working with data and technical analysis. You thrive in a multicultural environment. You meet and greet people with a smile and have a can-do attitude. You work with a humility and respect for the people around you. You are robust, flexible and able to prioritise tasks to meet defined timelines. You work structured with a quality mindset and enjoy working independently and proactively in a dynamic entrepreneurial environment. You will to a large extent be able to influence your internship depending on your Interests, competencies and ambition level.

We expect you are studying for a bachelor's degree in Engineering, preferably Manufacturing & Management, Chemical Engineering & International Business, Chemical & Bioengineering and Mobility, Transport & Logistics. You communicate fluently in English and possess excellent IT skills. The internships are 5-6 months with start in February or August. We have internships in the following departments: Manufacturing Sciences, Finished Goods, Drug Product, Supply Chain and Business Intelligence. Soon to be posted at our website <https://fujifilmdiosynth.com/careers/>
